

Farah Kamila

+974 5519 8230 | Al Wakrah, Qatar | farahkamila@icloud.com

PROFILE

Bachelor of Science graduate with a specialization in **genomics and bioinformatics**, passionate about applying computational approaches to biological problems. Proficient in **Linux, Python, and R**, with a strong foundation in **data analysis and visualization**. Demonstrated ability to conduct literature reviews, manage laboratory inventories, and adhere to standard operating procedures. Eager to apply data-driven approaches to advance health research initiatives in Qatar.

EDUCATION

Monash University Malaysia

Selangor, Malaysia

Bachelor of Science (major in Genomics and bioinformatics)

- *Coursework:* Biology, Chemistry, Statistics, Biotechnology, Biochemistry, Anatomy, Microbiology, Genetics, Genomics, Bioinformatics, Pharmacology, Ecology, Java Programming, Mathematics

PROFESSIONAL EXPERIENCE & CERTIFICATIONS

MenaML Winter School

Doha, Qatar

Attendee

February 2025

- Selected as one of 140 attendees for this intensive six-day program focused on machine learning and its applications in various fields, including genomics.
- Engaged in practical workshops, gaining hands-on experience with ML tools and algorithms.

Monash University Malaysia

Selangor, Malaysia

Peer Tutor

July 2023 – October 2023

- Led 12 weekly study support sessions for CHM1052 – Chemistry 2 advanced, **guiding 30 students**.
- Developed original presentations, visual aids, and practice material to ensure consistent and active student involvement, resulting in an **86% student-reported improvement** in grades.
- Worked closely with the CHM1052 Teaching Staff to align study sessions with key exam topics, ensuring students were well-prepared for assessments.

Monash University Malaysia Genomics Facility

Selangor, Malaysia

Intern

July 2023

- Reviewed literature on laboratory protocols for preparation of bacterial genome DNA.
- Conducted **Polymerase Chain Reaction (PCR), gel electrophoresis, DNA isolation, library preparation, purification, and quantification (spectrophotometer/fluorometer)**.
- Assisted in **laboratory inventory management** and equipment maintenance.

BD (Becton, Dickinson and Company)

Remote

Research Intern

June 2022 – August 2022

- Conducted **literature review** on innovative **drug delivery systems**, including microneedles and biodegradable polymers.
- Evaluated emerging biomedical technologies by analysing 20+ **peer-reviewed articles, patent databases, and market reports** to assess their clinical applicability and translational potential.
- Delivered a **data-driven presentation** outlining the feasibility of alternative drug delivery methods, proposing **strategic research directions** for BD's future product development.

PROJECTS

Analysis of *Mycobacterium tuberculosis* strain using bioinformatics tools

- Utilized Linux commands to execute **data pre-processing** (FastQC, Trimmomatic) and **genome assembly** (SPAdes, ABySS, SOAPdenovo2).
- Executed **genome annotation** (RAST, Prokka), identifying 16S rRNA sequences and core genes for functional analysis.
- Leveraged **BLAST and R** for phylogenetic tree construction, determining evolutionary relationships with other *Mycobacterium* species.
- Performed **in silico DNA-DNA hybridization** (ANI, GGDC) to confirm species-level identification.

SKILLS

Tools:	Microsoft Office Suite, Google Workspace, Java, Python, R, Linux
Professional Skills:	Data Analysis & Visualisation, Scientific Research, Literature Review, Laboratory Protocol, Computer Literacy, Technical Report Writing, Presentation
Soft Skills:	Problem-Solving, Critical-Thinking, Leadership, Oral & Written Communication, Time Management, Adaptability, Conflict Resolution
